

The figure displays three box plots side-by-side, representing the distribution of 'number' for three categories: 'none' (red), 'small' (blue), and 'big' (yellow). The y-axis is labeled 'number' and ranges from 0 to 25. Each box plot shows the median (horizontal line inside the box), the interquartile range (the box itself), and the range of the data (the whiskers). Outliers are plotted as individual points beyond the whiskers.

- none (red):** The median is approximately 10. The box spans from about 5 to 15. The whiskers extend from 0 to 20. There are several outliers, including one at 25 and another at 0.
- small (blue):** The median is approximately 10. The box spans from about 5 to 15. The whiskers extend from 0 to 20. There are several outliers, including one at 20 and another at 0.
- big (yellow):** The median is approximately 10. The box spans from about 5 to 15. The whiskers extend from 0 to 15. There are several outliers, including one at 15 and another at 0.
