

The figure displays three boxplots side-by-side, representing the distribution of the number of children per family for three different countries. The y-axis is labeled 'Number of children' and ranges from 0 to 10. The x-axis is labeled 'Country' and has three categories: Sweden, Germany, and the United States.

- Sweden (Red boxplot):** The median number of children is approximately 2. The interquartile range (IQR) is from about 1.5 to 2.5. The whiskers extend from approximately 0.5 to 3.5. There are several outliers above the upper whisker, with values around 4, 5, 6, and 7.
- Germany (Blue boxplot):** The median number of children is approximately 2. The IQR is from about 1.5 to 2.5. The whiskers extend from approximately 0.5 to 3.5. There are several outliers above the upper whisker, with values around 4, 5, 6, and 7.
- United States (Yellow boxplot):** The median number of children is approximately 1.5. The IQR is from about 1 to 2. The whiskers extend from approximately 0.5 to 2.5. There are several outliers above the upper whisker, with values around 3, 4, 5, and 6.
