

The figure displays three box plots side-by-side, representing the distribution of 'number' for three categories: 'none' (pink), 'small' (blue), and 'big' (yellow). Each plot includes a box representing the interquartile range (IQR), a horizontal line for the median, and whiskers extending to the minimum and maximum values within 1.5 times the IQR. Outliers are shown as individual points.

- Category 'none' (pink):** The median is approximately 10. The IQR spans from about 5 to 15. The whiskers extend from 0 to 20. There are numerous outliers, with values ranging from approximately 20 to 30.
- Category 'small' (blue):** The median is approximately 10. The IQR spans from about 5 to 15. The whiskers extend from 0 to 20. There are several outliers, with values ranging from approximately 20 to 25.
- Category 'big' (yellow):** The median is approximately 15. The IQR spans from about 10 to 20. The whiskers extend from 5 to 25. There are two outliers, one at 0 and one at 30.
