

The figure displays three box plots side-by-side, representing the distribution of 'number' for three categories: 'none' (red), 'small' (blue), and 'big' (yellow). The y-axis is labeled 'number' and ranges from 0 to 100. Each box plot shows the median (horizontal line inside the box), the interquartile range (the box itself), and the range of the data (the whiskers). Individual data points are overlaid on the box plots. The 'none' category has a median around 35, the 'small' category around 45, and the 'big' category around 55. All categories show significant outliers, particularly on the higher end of the 'number' scale.
