

The figure displays two box plots side-by-side, representing the distribution of the variable 'number' for two categories: 'none' (pink) and 'many' (teal). The y-axis represents the 'number' values, ranging from 0 to 100. The 'none' box plot shows a median around 10, with a box from approximately 5 to 20. The 'many' box plot shows a median around 40, with a box from approximately 25 to 60. Both distributions are right-skewed, with many outliers extending upwards. The 'many' category has a significantly higher median and more spread than the 'none' category.
